

CEO's Message for April 2023

The Indus Training and Research Institute (ITARI) is the only of its kind in India for preservice and in-service teacher training in international education. It's uniqueness lies in being part of the ecosystem of Indus schools. This enables internships and collaboration with mainstream IB teachers. Just like the analogy of a medical college and a sister hospital collocated.

Presently, ITARI offers a **Postgraduate Diploma in International Education by the Birmingham City University (PGDIE)**, and the **Cambridge International Diploma in Teaching and Learning (CIDTL)**. These courses are hybrid in nature, thereby enabling students to remain in their respective schools, jobs, and cities, and undergo the course. All courses are conducted by an experienced PhD faculty that mentors individual students as well.

A distinguishing feature of all courses is that ITARI is proactive in ensuring **100 % placement** in reputed schools all over India.

In the near-future, ITARI will be conducting a six-month **Diploma in Early Education** from one of the renowned universities in Finland, at very affordable fees. Watch out for greater details.

ITARI awards a **one-year research scholarships** to five graduates at the end of each course. In addition, a **Meta Lab** is being setup for R & D for application of metaverse technologies in K 12 education. Graduates from renowned IITs are part of this project.
