

CEO's Message – July 2023

After extensive feedback from parents, teachers and students, our Robot-based Teacher Assistant will be an essential partner in collaborative learning. After detailed research and careful consideration, we have integrated ChatGPT 4 into the Teacher Assistant. This will go a long way in academic achievement and personal growth. It will serve as a valuable resource, enabling personalised support and guidance for every student.

This fusion of human-AI integration, will allow for more individualised attention, development of a creative mindset, and immersive learning. You will be happy to learn that we have a separate team of experienced teachers, who design lesson plans that provide immersive experiences to our students.

Consequently, collaborative learning will take centre stage in all Indus schools. Together, we are embarking on an exciting journey that embraces innovation and creativity.
