

## CEO's Message for 2026

"Happy New Year" to our parents, teachers, staff, and students!

As the world shifts beneath our feet, remember that 2026 will not be a repeat of 2025. This evolution demands fresh perspectives. Let us set bold resolutions: to **master emerging technologies**, **deepen our human empathy**, and **build unshakeable resilience**.

**To my dear students:** The map that guided us through 2025 will not lead you in 2026. Your challenge this year is not just to learn answers, but to ask better questions. Do not just watch the world change; but be the ones who shape it.
