

CEO's Monthly Message: August 2026

In an era flooded with data and Artificial Intelligence, information alone is no longer our edge – wisdom is.

At Indus, our teachers are reimagining their role as **"teachers of the child"** – moving beyond delivering content to cultivating character, purpose, and values.

Technology amplifies efficiency, but only **human wisdom** provides direction.

By combining AI capability with disciplined judgment, our educators act as **wisdom workers**, guiding students to think critically and lead with agency.
